Resumen

Passionate video game developer with experience in creating innovative mechanics, AI, and immersive game systems in Unity and Unreal Engine. Specialized in C# and efficient architecture principles to ensure good performance.

Experiencia laboral

Technical support for systems, Universidad Francisco de Vitoria (Tiempo parcial), Madrid

agosto 2023 - Presente

CAU (Customer Service Centre) technician responsible for incident management. Establish a communication channel between users and those responsible for resolving such incidents.

QA Tester, Pendulo Studios (Contrato), Madrid

noviembre 2022 - diciembre 2022

Video game tester: Tintin Reporter - The Cigars of the Pharaoh

Programmer, Diputación Provincial de Soria (Prácticas), Madrid

julio 2024 - junio 2025

The research team behind the "Origins: In the Footsteps of the Írrico" project has brought the excavation and recreation of the caves of Soria to life in a virtual museum using Unreal Engine 5.

Indie developer - Programmer (Autónomo)

septiembre 2024 - junio 2025

I participated in an indie project as one of the main programmers, responsible for developing the simulation and behaviour of schools of fish and other underwater species.

Aficiones

Music, because I play the drums. I also like chess, reading, board games, cooking, and sports, especially athletics and football.
